

107. Materials Posts (25 posters in two sizes A4 and A5)

LOW
QUALITY
SAMPLES

1. Every object that you see is made from materials.
2. The same object can be made from different materials. Do you know why?
3. There are lots of different materials. They look different.
4. They can feel different.
5. Materials can smell different.
6. Materials can taste different but not many are safe to taste!
7. Materials can sound different
8. You can see through some materials but not through others.

9. Some materials are waterproof.
10. Some materials are magnetic. They are attracted to a magnet. Some materials are not magnetic.
11. Some materials let electricity flow through them. Others don't. What would you use here to test whether the material lets electricity flow through it?
12. Some materials are found naturally. We call them natural materials.
13. Rocks and pebbles are natural materials but they aren't all the same.
