

169. Amazon Rainforest Creatures - Posters to Print

In two sizes - A4 and A5

2 poems and
an Animal Alphabet

Rainforest Animals by Michal Olszyna

Where can you find a creature?
In the rainforest you will
High up on a tree to where it
can be seen with the monkey and parrot
Spidrels leaping from one to one,
while bees go flying free.

There's a bee, mosquito, and much
leeches, there's a hanging lizard
Down on the rainforest floor
are big and small creatures galore.

The anaconda, deer, and frog
plus tortoise and anaconda leg
Every day, heard by hear,
butterflies float on a breeze.

Lizards and snakes also play
In rainforest places all day.
Owlies, jaguars, leopards,
The rainforest is a wonder world.

Deep in the rainforest
Is a kapok tree so high.
Look very closely,
What do you spy?

A blue morpho butterfly flying by,
A brown monkey swinging
towards the sky,
A yellow snake gliding,
A green frog hopping,
A red parrot squawking
And a black bat hiding.

Amazon Animals

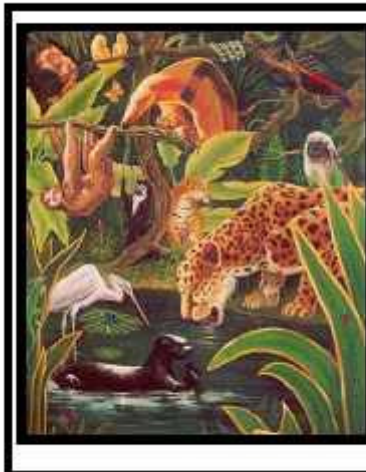

A - anaconda
B - blue morpho butterfly
C - capybara
D - deer
E - eagle
F - frog
G - gibbon
H - howler monkey
I - iguana
J - jaguar

SAMPLES

What lives
in the
dense
Amazon
Rainforest?

What can
you see in
this painting
of Amazon
animals?

The rhinoceros beetle is the largest of all beetles and can be as long as 10 cm. It uses its horns to dig and bury itself underground to escape danger. During the day they hide under logs or in vegetation. At night adults eat rotting fruit and tree sap.
