

# 209. Life Cycle of a Frog

Eight Posters in two sizes — A4 and A5

The strip contains eight posters illustrating the stages of a frog's life cycle:

- Poster 1:** A green frog with the text "from tadpole to frog".
- Poster 2:** A frog egg with text: "From the egg to the tadpole. Our parents gave them a lot of care. When in the spring my mum and I watch the tadpoles swimming by. I wonder if the tadpoles know: 'Do they go swimming to and fro? This can they still be swimming legs? Do you know why?'".
- Poster 3:** A tadpole with text: "The tadpoles are called frog larvae. They have long tails and short legs. They can swim very fast. They have long tails and short legs. They can swim very fast. They have long tails and short legs. They can swim very fast." (Note: The text in the image is partially obscured and repetitive).
- Poster 4:** A tadpole with text: "The tadpoles get bigger they start to grow back legs. Then they grow front legs. Their tails start to shrink." (Note: The text in the image is partially obscured).
- Poster 5:** A tadpole with text: "The tadpoles start to look more like their frogs." (Note: The text in the image is partially obscured).
- Poster 6:** A froglet with text: "They become tiny froglets." (Note: The text in the image is partially obscured).
- Poster 7:** A froglet with text: "The tadpoles start to look more like their frogs." (Note: The text in the image is partially obscured).
- Poster 8:** A large frog with text: "The tadpoles start to look more like their frogs." (Note: The text in the image is partially obscured).

As the tadpoles get bigger they start to grow back legs. Then they grow front legs.

Their tails start to shrink.

The poster features a large photograph of tadpoles in a pond with green leaves and red stems. To the right is a vertical sequence of eight illustrations showing the stages of a tadpole's development, from a simple egg to a froglet with a long tail.
