

# (3) MiniBeast Hunt

Shown smaller than original

**White trays** to keep the mini beasts in with some leaves, bark or stones for them to hide in.

**A pooter** so that we can suck gently through one straw to draw the minibeast into the jar through the other straw.

**Magnifying glasses** to help us to get a better view.

Mini-beasting for all the children.  
Have them for days, or use as leaf!  
We've seen them pooter in bushes,  
How I wonder where we could find...

Let's look on a leaf  
Remember to look underneath  
We might find a caterpillar having its lunch, then it is  
going "chomp, munch, munch!"

Let's look under a log pile...  
It looks like a worm, there's a long wiggler  
We might find some woodlice in the wood on logs  
They're found in a soil, they're going "tikky!"

Let's look in the soil, the ground,  
We can find some beetles and worms  
We might find a worm eating a wriggle,  
We might find some going "wiggle, wiggle, wiggle!"

Let's look on the ground,  
Can we see any mould?  
We might see some ants who are in a hurry  
They're busy in the ground, they're busy!

Let's look in the long grass...  
It looks as if we might find  
We might find a spider at home in the web  
Dangling and dangling on a long thread!
