

97. From Bathing Machines to Beach Chalets

A **Pictorial Timeline** to help the children to place the information covered in the two PowerPoints in the context of time.

The time line prints over four A4 (landscape) sheets that need to be joined together to form a pictorial timeline. The A4 sheets are shown in the small screenshot below.

Each A4 sheet covers one century - 1700s, 1800s, 1900s to present day.

The individual sections advance in blocks of ten years.

These thick black lines are intended as cutting guides to help with joining the sheets together.

An **A4 Map** to help the children to find the main seaside towns mentioned in the PowerPoints and associate the historical events and characters from the pps with those towns.
