Doctor Russell's Sea Water Cure

In 1750 Dr Richard Russell said that bathing in sea water was good for people's health and could cure all kinds of illnesses.

Soon other doctors started to prescribe this cure for their patients. Not only were patients told to bathe in sea water but they were also told to drink it!

The Victorians said

People should cover up. They shouldn't show their bodies in public!

It's wrong for men and women to bathe together!

1927

These children are at the seaside, in 1927. They are wearing knitted wool swimming costumes that got very heavy and very baggy when they got wet.

Girls swim wear from the 1890s
